TARE 2400

Candour's Cargotecture ("Cargo Architecture") concept is our idea for sustainable development. Our idea is to use containers that are left in depots after their lifecycle and turn them into a recycled structure that can be fitted with any idea. We want to Create Eco Friendly, Turn Key and Customised Restaurants, Bars, Cafes, Retail, Events, and Commercial Businesses; Utilising Modified Recycled Shipping Containers. We Also want to Develop Sustainable Food and Retail Container Parks.

Being modular in nature the containers can be moved virtually anywhere reducing the costs of rebuilding a structure at a new location. The flexibility that comes with temporary locations increases consumer accessibility to products or services.
